MANAGEMENT PRESENTATION

ATTRIBUTES OF **SALMI**

- To provide organized information to **optimize the management of services and logistics of medicines and supplies** in primary care facilities, Health Networks, Health Regions and Central Level, in order to make managerial decisions at all levels.
- It is a user-friendly, validated, open-use software tool that **does not require complex technologies or operating personnel with advanced** computer skills.
- Capacity to **record unmet demand**, facilitating timely and accurate decision making to improve the availability of medicines and supplies.
- It provides adequate attention to users, facilitating the availability of medicines and supplies at the time they are needed, since it records **nominal information on care**, facilitating the follow-up of users.
- It avoids economic losses through preventive actions derived from an analysis of the information that the system presents in an adequate, clear and timely manner, according to the **average consumption** of medicines and supplies.
